Issue 9306

Tetra Pak
Tetra Brik Packaging Systems AB

Service

When ordering spare parts for your machine, contact the nearest Tetra Pak service station. You will find a list of all service stations at the end of this publication.

Manufacturer

This machine is produced by:

Tetra Brik Packaging Systems AB
Ruben Rausings gata
S-221 86 LUND
Sweden

Machine Identification

The machine plate on the right is an example of the type of machine plate attached to the machine frame. The plate carries data needed when contacting Tetra Pak concerning this particular machine.

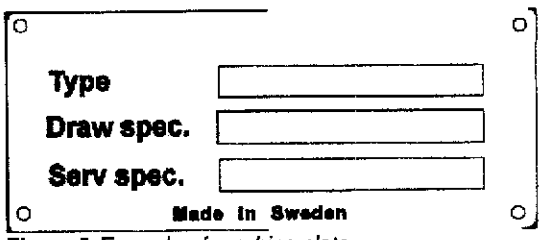

Figure 5 *Example of machine plate*

The location of the different machine plates is shown on the page "Location of machine number plates", page I-7.

Document Information

Purpose of the Spare Parts Catalogue

The purpose of the Spare Parts Catalogue (SPC) is to provide the service technicians and contact personnel with information on how to find and order spare parts for repairing and servicing the machine.

For instructions on how to replace parts and adjust machine setup, see the Maintenance manual.

Design Modifications

The content of this document is in accordance with the design and construction of the machine at the time it was delivered from the Tetra Pak machine production facility.

Document producer

This document has been produced by:

Tetra Brik Packaging Systems AB
Teknisk Documentation
Ruben Rausings gata
S-221 86 LUND
Sweden

Further copies

Additional copies can be ordered from nearest Tetra Pak service station. You will find a list of all the service stations at the end of this publication. Copies are also available directly from:

Tetra Laval Marketing Services AB
Central Technical Publications
Ruben Rausings gata
S-221 86 LUND
Sweden

When ordering technical publications, always quote the **document No** printed on the front cover of the document concerned.

Number of pages

This document contains a total number of ***25 introduction and 284 catalogue pages.***

Copyright

This document is protected under the Copyright Act and **must not be copied** without the express permission by Tetra Pak.

№

For the correct machine data, check your machine specification, supplied on machine delivery!

How to find the correct Spare Part Number

A. Check that the data on your machine type sign, and/or machine specification corresponds with the catalogue, in which you are looking at right now. If not change/order an actual catalogue.

1. Main groups of the machine

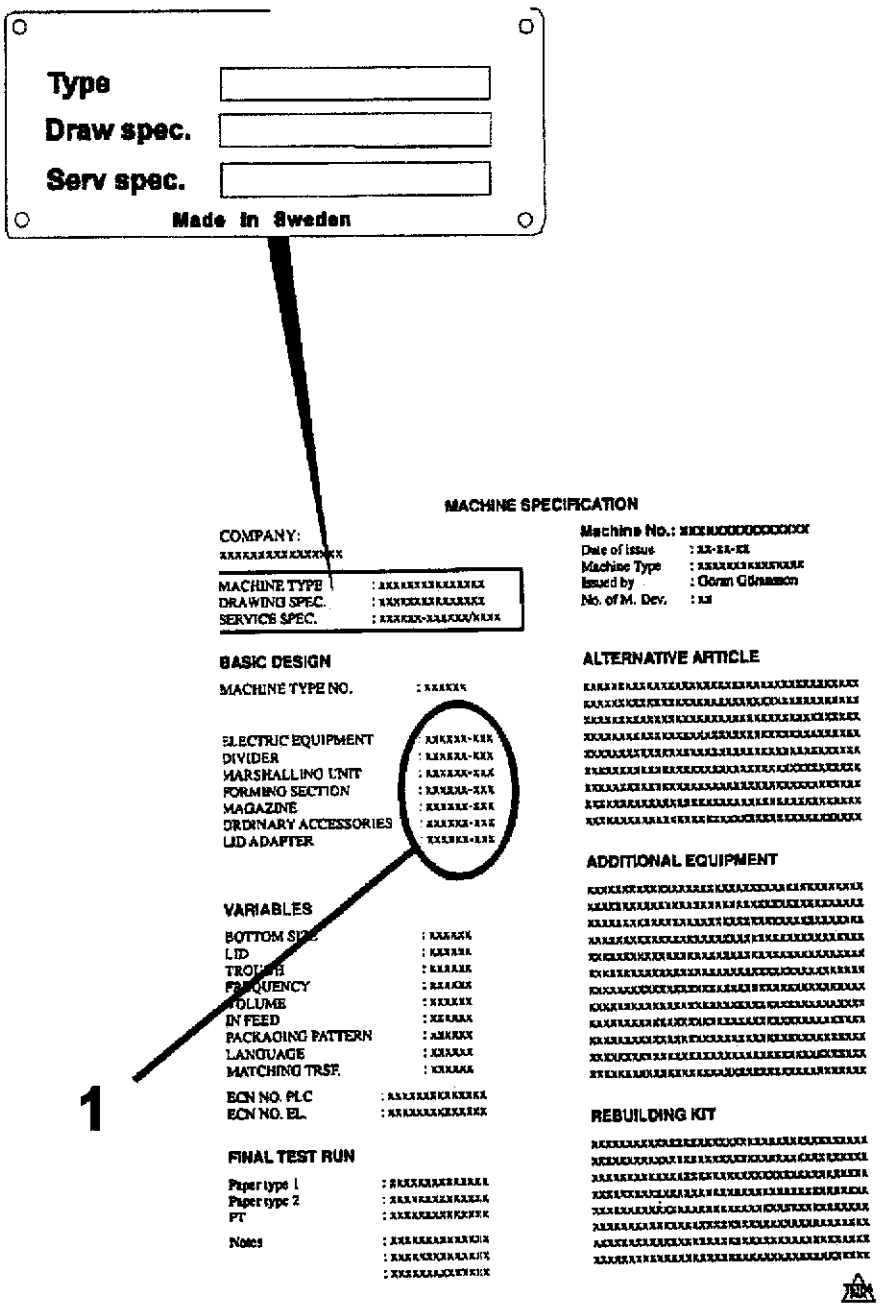

Figure 11 *Example of machine specification*

Tetra Pak

B. The second catalogue sheet contains a table of content for the main groups, included in the catalogue.
The information regarding machine and main group status MUST correspond with your machine specification.
Locate and choose the main groups page number, in which you want to search for spare parts.

1. Main group of the machine
2. Machine Type

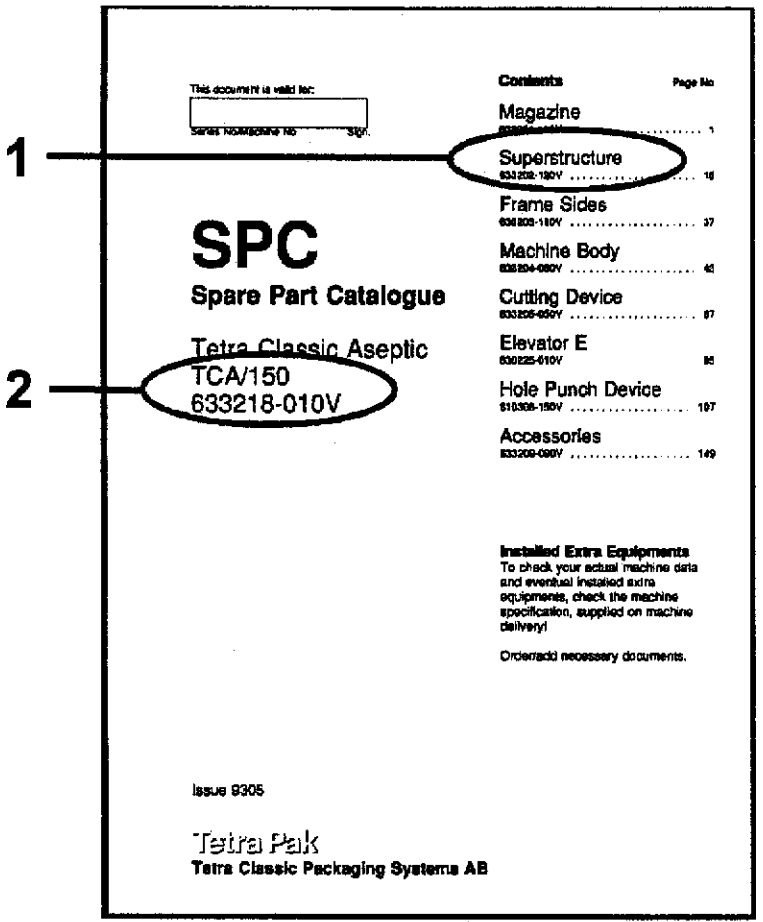

Figure 12 *Example of catalogue content*

Continued overleaf

How to find the correct Spare Part Number

C. Search in the main group illustration, the item number, which may hold your wanted spare part. Go to the text page below and read page number for the actual group.

4. Internal information, such as latest Alteration Message, bill-of-materials included in catalogue page.
5. Pos number on main group illustration
6. Pos numbering on illustration.
7. Illustration number in the SPC database.
8. Continuous page numbering through the document.
9. Pos number corresponding to illustration.
10. Group or article number, to spare parts store.
11. Group or article description.
12. Machine type including development status.
13. Group description.
14. Group number (bill-of-material) including development status.
15. Document number.

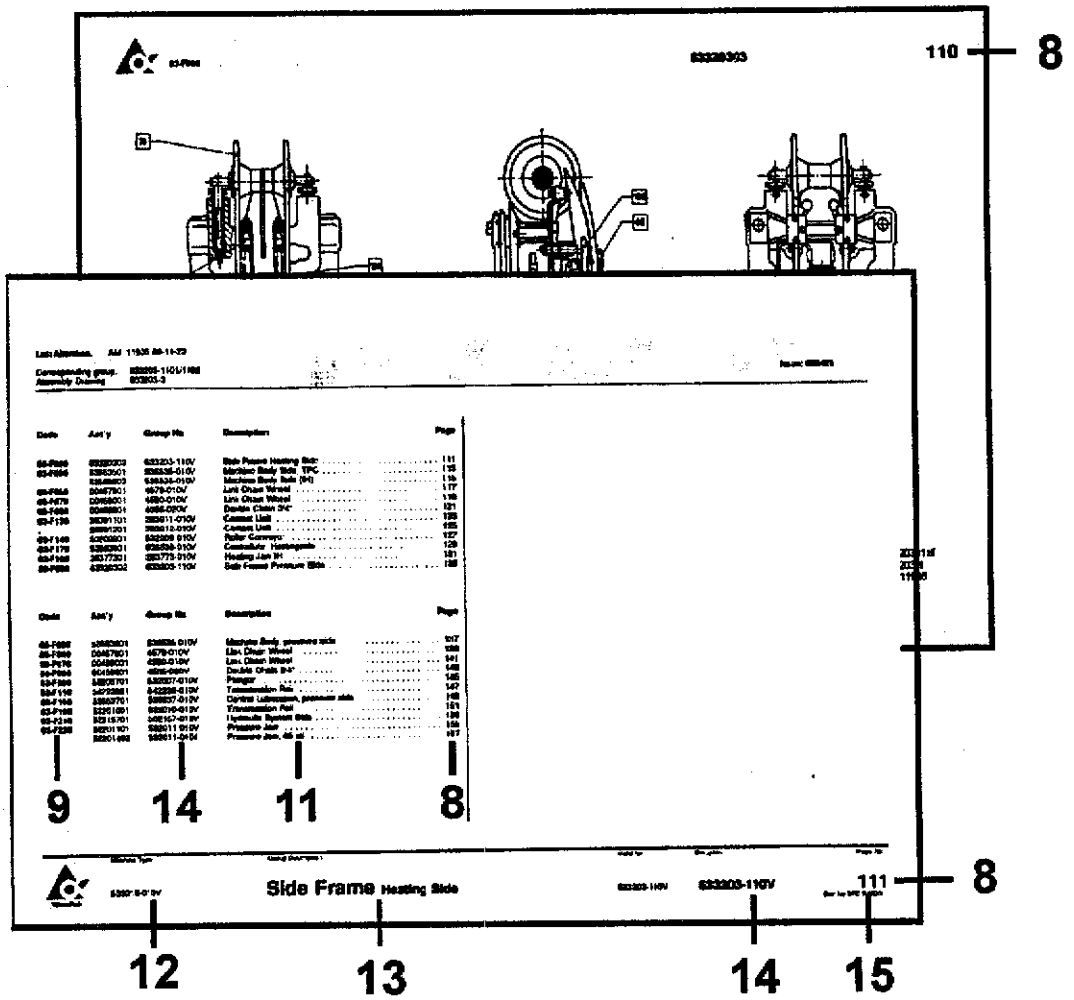

Figure 13 *Example of Section index*

D. Continue to the found page number, and search in the illustration, for your spare part. Go to the text row for the found item number, and read the part number. Take eventual variant headings in consideration; if you are unsure, read your machine specification.

16. Variant heading, eg volume, left/right etc.
17. Heading for common parts.
18. SP = Code for articles, which are included into various spare part kits.
    U = Kit 101, start up parts supplied on machine delivery.
    P = Kit 102, production parts to be held at production site workshop.
    S = Kit 103, overhaul parts to be held at service stations store.
    C = Kit 104, security parts to be avaiable at the central store.
19. UN = Short code for measure units eg mm, kg etc.
20. Qty = Number of item needed in the complete assembly.

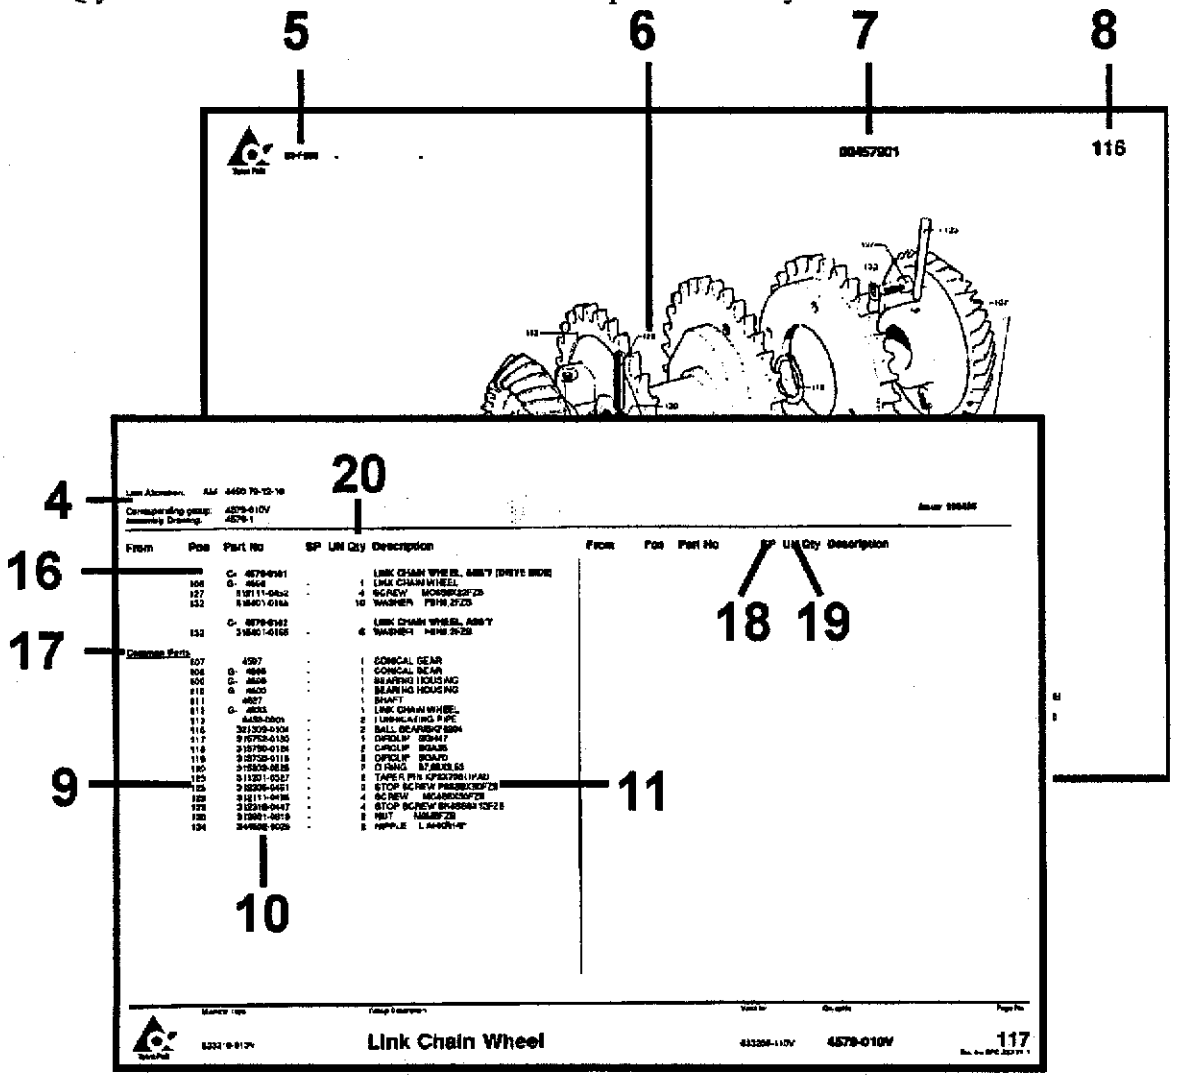

Figure 14 *Example of catalogue page*

On the page overleaf you will find a complete page number index, for the catalogue, sorted in both alfabetical and numerical group number order. A similar index will be found at the beginning of each main section, containing the sections pages in geographical structure/page number order.
